

# The Shared Savings Program

Reduce your business monthly electric lighting bill 50%-90%

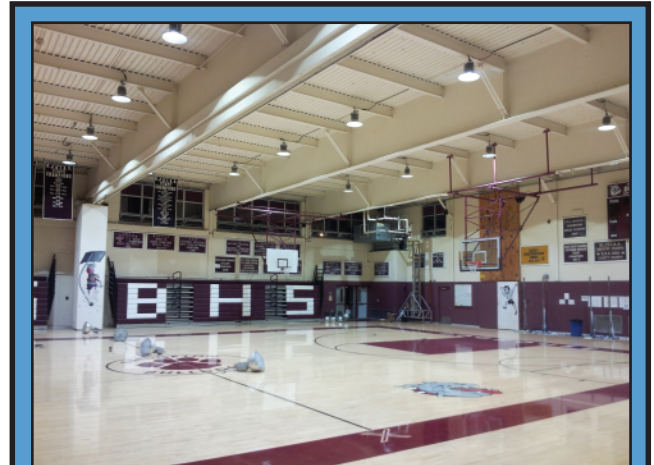

**Pay NO upfront cost** and have your entire facility retrofitted with LED lighting!

Have your LED lighting fully installed and maintained for up to 10 years!

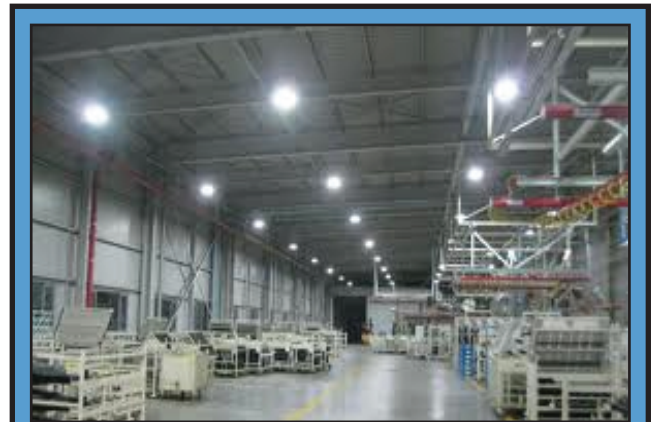

## How the program works:

- ▶ First a representative from Bright Idea LED, a NJ START Vendor #V00003406, will come to your facility and inventory your current lighting and collect past electric bills.
- ▶ A proposal is created for your facility outlining the optimal LED solutions, the energy savings they create, as well as the environmental benefits.
- ▶ When the proposal is approved further documentation is submitted to verify the good credit standing of the business.
- ▶ The Lighting Service Agreement is created. This lays out the entire scope of the project: the proposal, LED solutions, installation schedule, and shared savings schedule.
- ▶ Once the Lighting Service Agreement is executed the installation begins. Thirty days after the installation is complete the shared saving schedule begins.
- ▶ All PRODUCTS AND LABOR are warranted for the entire length of your Lighting Service Agreement.

## How much do businesses save on average:

**Avg. of \$48,000  
in Monthly Savings**

**Avg. of \$35,000  
in Monthly Savings**
