All-In-One Solar LED Streetlight

Bright Idea LED is very proud to introduce the All-In-One Solar LED Streetlight.

This elegant and modern lamp combines two great energy saving technologies. By combining the low energy consumption of LED with the energy gathering power of solar technology this lamp can be used in areas that electricity is not accessible or anywhere you want to save money. With an available motion sensor add a more security to your property without worrying about innefficent lighting burning a hole in your pocket!
